

# Kidsbridge Power Charger

Do you know how to fold a fortune teller? If not, go to <https://www.wikihow.com/Fold-a-Fortune-Teller> to learn how. After you make all your folds, flatten out your fortune teller and make it look like this. Fold the paper back up. Now you have a Kidsbridge Power Charger! Here's how to play.

- Ask someone to pick a color and a number. Pull back the flap for that section and complete the sentence.
- Now pick a color and a number for that person and have them complete the sentence.
- Repeat this process with as many people as you can to learn how they feel and what they can do!

*\*You can make up your own way to pick which flap to open, like rolling dice or pulling colors out of a bag. \*Ages 7 and up: You can make the process more fun and take longer by spelling the name of the color or counting as you move the Power Charger with your fingers: e.g. g-r-e-e-n, 1-2-3, then pick a second, different number and complete that sentence.*

**The Power Charger works best if you take time to complete each statement thoughtfully.**
