

Texture Bag

This is an activity that can be initiated by an adult with a child OR an older child can set it up for an adult. It can be fun for two people or a whole a group!

How to Play:

- Collect several interestingly shaped items and put them in a bag.
- Ask someone to reach into the bag and select an item without removing it from the bag.
- They should describe it and try to identify it.
 - Helping younger players:
 - Suggest words like rough, bumpy, indented, soft, hard, ridged, smooth, pointy
 - Ask questions about the items to help the player to identify them.
- Pass the bag around until every item has been identified.

You can empty the bag and play again and again with different items!
